EDUCATION

University of Waterloo

Bachelor of Computer Science (GPA: 87.2%/3.80)

Waterloo, ON

Sep 2022 – May 2027

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, Python, Kotlin, Java, PostgreSQL, C++, C

Frameworks: React, React Native, Jetpack Compose, Next, Svelte, Flask

Tools/Services: Git, Expo, Android Studio, Xcode, Postman, Docker, Kubernetes, GCP, AWS, Vercel

EXPERIENCE

Vivid Seats

Toronto, ON

Mobile Software Engineer Co-op

May – Aug 2026

- Selected for the Mobile Software Engineering role on the React Native team to build customer-facing features for Android and iOS

Boosted.ai

Toronto, ON

Software Engineer Co-op

Jan – Apr 2026

- Shipped production features in a Scrum full stack team primarily using React (TypeScript) and Python
- Owned the end-to-end revamp of the chat search and embed feature—collaborating with UI/UX designers to redesign the interface—to deliver a dramatically improved chat experience
- Developed scalable Redis-cached Python endpoints to enable efficient template-based discovery in the agent catalog
- Became highly proficient with Claude Code, incorporating it to build out the core functionality and UI of the mobile version of our new product in React Native (TypeScript), and key features and improvements in the web app

Shift Browser (Redbrick)

Victoria, BC

Software Engineer Co-op

Jan – Aug 2025

- Contributed to key browser features including the omnibox, tabs, and settings across the React (TypeScript) web interface and C++ Chromium backend as a member of the Browser UI team
- Built key API-integrated pages and all transitions with Motion in the end-to-end development of Onboarding
- Significantly expanded frontend unit and interaction test coverage using Vitest and Storybook, respectively
- Overhauled focus management and refactored for maintainability, immediately resolving 10+ active bug tickets
- Built a pipeline across GitHub, Jira, and Slack using YAML to automate internal dependency updates

Tectmind

Montreal, QC

Software Engineer Intern

May – Aug 2024

- Developed a React (TypeScript) mapping interface with Mapbox GL for visualizing and querying New York City zoning districts, integrating external datasets and implementing multiple search methods
- Built RESTful APIs to process and store complex zoning data from NYC ZoLa using Python and PostgreSQL
- Transformed wireframes into responsive, production-ready pages using React and SASS

ProNavigator

Waterloo, ON

Frontend Developer Co-op

Jun – Aug 2023

- Developed the UI and integrated APIs for various internal tools such as search and filter functionality for customer policies and field-validating forms to streamline data collection for insurance agents using React and Material-UI
- Collaborated with UI/UX designers to create mockups and ensure consistent and usable interfaces
- Implemented new and expanded existing frontend test suites using Jest and React Testing Library

PROJECTS

FOMO

Live Location Social App

- Collaborated with and led a team of 4 to build an Android app in Kotlin with Jetpack Compose
- Developed the backend for features like “OMW”, friend circles, and shared places utilizing Supabase (PostgreSQL)
- Prototyped with Figma and implemented the user interface as the sole full stack developer
